Template Modifier

Plugin for Joomla!

Version 1.0

Preface

The plugin allows:

- altering CSS,
- loading javascript source file
- adding inline javascript code to header

without changing the template.

It makes easier to upgrade the template from a club that regularly updates its templates for new Joomla version etc.

Parameters description

Parameter	Description
<i>Advanced parameters</i>	
CSS	CSS definitions that will be placed into page header directly.
Javascript file	Javascript file to load in HTML header.
Javascript code	Javascript code to be included inline in HTML header. HTML script tag will be added automatically.
